CLEANROOM

**giroflex**  
designed to work

Certificate IPA, Fraunhofer Institute  
Electrostatic discharge (ESD)  
according to DIN EN 61340-5-1  
Classification of air cleanliness  
according to ISO 16644-1  
Antistatic artificial leather

**63-3074-RR**

- Artificial leather cover, antistatic
- Low backrest
- 5-star leg base in aluminium, powder-coated
- Castors 50 mm, antistatic

**63-3574-RR**

- Artificial leather cover, antistatic
- High backrest
- 5-star leg base in polished aluminium
- Pushing rod cover
- Castors 50 mm, antistatic

# GIROFLEX ADAPT CLEANROOM CHAIRS

## The cleanliness is impressive.

The Cleanroom Chair by Giroflex meets the high requirements of its surroundings. Its design is simply ingenious, so that every place on the chair can be easily reached and cleansing is simplified. Its emissions performance is just as convincing, since very few undesired particles are emitted. The work chairs also take care of difficult tasks. They are antistatic and can be thoroughly cleaned thanks to the cover made of artificial leather.

They have been examined by the Fraunhofer Institute and certified for their cleanroom properties. Their ergonomics are also exemplary. Whoever takes a seat on a giroflex Cleanroom Chair or Stool will sit in a more pleasant, healthier way and can even concentrate better. The reason is a separation of the seating surface of the chair. The back part of the two-zone seat profile optimally supports the pelvis, while the inclined front part ensures good circulation in the legs.

### 64-3078-RR

- Artificial leather cover, antistatic
- Low backrest
- Aluminium parts powder-coated
- 5-star leg base in aluminium, powder-coated
- Pushing rod cover
- Castors 50 mm, antistatic
