Artificial leather

63-3074-LAB

- Artificial leather cover
- Low backrest
- 5-star leg base in aluminium,
powder-coated
- Castors 50 mm

GIROFLEX ADAPT LAB CHAIRS

For intensive research work. The Giroflex Lab Chairs are at home in research. They are found in the areas of medical, chemical and information technology, as well as in the life sciences. Wherever experiments are conducted under strict hygienic conditions and objects must be examined in a very precise way, the Lab Chairs by Giroflex are exactly right. The chair models are designed for this environment.

In order for the researchers and lab technicians to concentrate completely

on their work, it must be possible to adjust the work chairs – when working with microscopes, for example – in a precise manner.

Whichever model you work with, you will be individually supported by the Giroflex all-rounders in their robust and resilient way. With their contemporary design and variety of colours, they fit perfectly into the classic lab environments and modern office landscapes.

63-7574-LAB

- Artificial leather cover
- 1D armrests
- High backrest
- 5-star leg base in polished aluminium
- Castors 65 mm, chromed

64-3078-LAB

- Artificial leather cover
- Low backrest
